Supporting ORY curfew management

- Tools available for DSNA, Airlines and Airport (tailored views)
- Increased awareness regarding flights « at risk » of busting ORY curfew
- The earlier the detection, the better to possibly find mitigation measures and solutions.

ORY curfew

Reminder of what's already available for airlines concerned by ORY curfew

The screenshot shows the easyJet website interface. At the top, there's a navigation bar with 'easyJet' logo and various menu items. Below that, a search bar shows 'LFPO ARRIVALS' for the date range '2018-11-23 04:00' to '2018-11-23 23:59'. A summary box indicates '27 flights' with '7 delayed flights (135min.)' and 'Average per delayed flight: 19 min'. Below this is a table of flight arrivals with columns for ETA, TARGET, STATUS, ARCID, ATYP, REG., ADEP, EOBT, DELAY, CTOT, ATOT, CTA, E/ATA, and MP REG. A map window is overlaid on the table, showing a flight route from Paris to London.

ETA	TARGET	STATUS	ARCID	ATYP	REG.	ADEP	EOBT	DELAY	CTOT	ATOT	CTA	E/ATA	MP REG.

This window displays a detailed flight schedule for CSTTS (A319). It includes a table with columns for EOBT, ARCID, ADEP, ADES, E/ATA, CTOT, ATOT, CTA, E/ATA, MP REG, and CAUSE. The table lists several flights with their respective times and statuses. Below the table, there are tabs for different flight numbers and a timeline view showing the flight's progress over time.
